SUSHANTA NANDY

SDET | QA Automation Lead | Wealth & Asset Management Platform Specialist

Gurugram, India | +91-7488611162 | nandysushanta8@gmail.com | linkedin.com/in/sushantanandy | github.com/Sushanta-Nandy

PROFESSIONAL SUMMARY

ISTQB Certified Lead SDET with 5+ years of software engineering experience specializing in high-scale Wealth and Asset Management systems. Strong technical leadership in migrating legacy frameworks to modern high-speed automation engines (Playwright, Java, Appium) and architecting AI-driven automation pipelines. Deep functional expertise across Investment Operations, High Net Worth Individual (HNI) banking models, trade lifecycles, and automated financial calculations. Proven track record managing multi-resource cross-functional pods, defining project roadmaps, and presenting goal-wise metrics to executive stakeholders.

TECHNICAL & DOMAIN COMPETENCIES

- **Automation Frameworks:** Playwright (JS/TS), Selenium (Java), Appium (Mobile), RestAssured (API), TestNG
- **Wealth Management Domain:** Portfolio Management, Trade Order Execution, Fees & Charges Engine, Transfers-Out, Onboarding, Multi-Family/HNI Models
- **Infrastructure & DevOps:** Jenkins, BrowserStack (App Automate), GitLab, TeamCity, OpenSearch
- **AI & Virtualization Tools:** Virtuoso (AI Test Engine), LLM Test-Case Generation, Charles Proxy, Mockoon API Virtualization
- **Agile Program Delivery:** Burn-down Reports, Resource Matrix Optimization, Estimation & Goal-wise Status Tracking

PROFESSIONAL EXPERIENCE

Automation Test Analyst **(Wealth & Asset Management platforms)** | *FNZ Group*

Feb 2026 – Present | Gurugram, India | Clients: Stonehage Fleming (UHNW Multi-Family) & Quilter

- **Framework Migration & Architecture:** Led the complete architectural migration of legacy automated regression suites to Playwright. Standardized parallel execution and deployed to BrowserStack & Jenkins to accelerate release cycles by 40%.
- **AI Testing Strategy (Virtuoso):** Configured Virtuoso AI-driven automation engine for responsive UI validations, reducing dynamic object locator upkeep by 60% and scaling test resilience across global sites.
- **HNI Domain Pod Orchestration:** Orchestrated end-to-end automation strategies for Stonehage Fleming and Quilter portfolios across core transactional segments: Trading, Portfolio Management, Banking Models, Transfer-Out pathways, and Client Onboarding.
- **Financial Math & Compliance Validation:** Architected automation matrices for critical Fees and Charges calculations alongside automated Client Reporting validation to secure absolute compliance with global HNI financial audits.
- **Security & Access Controls:** Formulated robust security-centric automation profiles verifying User Access, multi-layered permissions, and enterprise push notification flows.
- **Project Metrics & Agile Management:** Assumed operational ownership of sprint delivery: created Burn-down charts, tracked Goal-wise milestone status, engineered Resource Allocation tables, and compiled reliable Projection Reports for senior executives.

SDET (Software Development Engineer in Test) | *Deutsche Telekom Digital Labs (DTDL)*

Jan 2024 – Jan 2026 | Gurugram, India

- **End-to-End Infrastructure:** Architected and expanded the primary E2E core automation pipeline from 0 to 220+ high-value scenarios, natively integrated with Jenkins and BrowserStack for instant cross-device evaluations.
- **Operational Resource Optimization:** Cut active manual regression workload by 30% and enhanced overall test bandwidth by 25% through automated script coverage strategy.
- **AI Generative Testing:** Engineered a proprietary LLM-driven Test Case Generator utilizing corporate API payload schemas to automate robust, synthetically accurate test inputs.
- **API Sandbox Modeling:** Implemented mock microservice behaviors utilizing Charles Proxy and Mockoon, reducing downstream server dependencies and cutting non-productive environment downtime by 50%.

Software Test Engineer | *Moolya Software Testing*

Jan 2021 – Jan 2024 | Bengaluru, India

- **CI/CD Pipeline Maintenance:** Designed and executed 350+ mobile automation scripts (Appium) run continuously on daily Jenkins pipelines.
- **Root-Cause Analysis:** Tracked and closed over 100 deep API, performance, and application logic bugs using Postman and OpenSearch.

EDUCATION, CERTIFICATIONS & HONORS

• **Academic Credentials:** B.Tech in Mechanical Engineering, OEC (2016-2021) | Japanese Language Certificate, St. Stephen's College (2025-2026)

• **Industry Accreditation:** ISTQB Certified, AI For Everyone (DeepLearning.AI), Certified Ethical Hacker (CEH v11 by Skillsoft)

• **Awards & Coding:** Best Mentor Award (Moolya Testing, 2023) | Solved 400+ LeetCode Algorithms | HackerRank Java Certified

• **Languages:** English (Full Professional), German (Goethe A1-A2), Japanese (Basic Proficiency)
